DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 9-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 9-12 are drawn to a computer readable medium. Applicant states on page 8, line 2 that a computer readable medium could be "carrier wave media". Signals and carrier waves are non statutory under U.S.C. 101 guidelines.

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest a wobble signal generator for artificially interpolating an ATIP signal that does not normally generate an ATIP signal.

The closest prior art Tsuji (US 7151732) teaches an artificial interpolation of an ATIP signal by an ATIP decoder. The ATIP decoder always generates an ATIP signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
